Notable Open Source Contributions

NMAG Nanomagnetic Simulator

nmag.soton.ac.uk/nmag

MAINTAINER & CONTRIBUTOR

2017 - PRESENT

- NMAG is a nanomagnetic simulator that has been cited in over 300 publications.
- Wrote a patch in 2017 that allowed it to be compiled easily with a modern software stack on Linux
- Continued maintaining said patch in the coming years.
- The patch saw significant use and led the creator of NMAG (Hans Fongohr), to ask if I would like to become the maintainer of the project in 2019.
- Since becoming the project maintainer, I have made the following contributions:
 - Worked to port the project off of the southampton.edu servers
 - Containerized the application using the singularity container platform
 - Worked to modernize the codebase.

Modular.js Framework
